

HPE PRIVATE CLOUD AI KEY BROCHURE SUMMARY

EXECUTIVE SUMMARY

- HPE Private Cloud AI is a fully integrated, enterprise-grade AI platform co-engineered with NVIDIA.
- Enables secure operationalization of agentic AI with governed data access and scalable production deployment.

WHY HPE PRIVATE CLOUD AI?

- ✓ Accelerates AI deployment through a pre-integrated infrastructure and software stack
- ✓ Maintains data sovereignty with on-premises, air-gapped, and governance-focused deployments.
- ✓ Delivers predictable economics for large-scale AI inference workloads.
- ✓ Reduces operational risk through validated hardware, software, and lifecycle management.

IDEAL USE CASES

- ⚙️ Agentic AI and enterprise copilots.
- ⚙️ Workflow automation and productivity enhancement.
- ⚙️ Advanced analytics and decision support.
- ⚙️ Regulated industries requiring strict data sovereignty.

BROCHURE CALL-OUT

- Deploy AI faster.
- Keep AI close to governed enterprise data.
- Ensure security, sovereignty, and compliance.
- Support multiple models, teams, and use cases.
- Scale with predictable performance and costs.

CUSTOMER BENEFITS

- ✓ Faster transition from pilot projects to production AI.
- ✓ Improved compliance, governance, and data security.
- ✓ Greater value from enterprise data, applications, and models.
- ✓ Predictable performance and costs as AI adoption scales.

CORE SOLUTION COMPONENTS

- ⚙️ HPE ProLiant Gen12 AI servers with NVIDIA GPUs.
- ⚙️ 400 Gb high-bandwidth Ethernet networking.
- ⚙️ HPE Alletra Storage MP X1000 for AI data services.
- ⚙️ NVIDIA AI Enterprise and HPE AI Essentials software.
- ⚙️ Unified operations, governance, monitoring, and lifecycle management.
